

## SPECIFICATION

The Poolpod Platform Lift provides dignified and independent access for swimmers who find it hard to get in and out of swimming pools.

- Independently operated by way of electronic wristband
- User can choose to either remain standing or sit using the custom submersible wheelchair
- Maximum working load - 250Kg
- Powder coated 316 grade stainless steel framework
- Powered by a 24V rechargeable battery
- Semi-portable - transport trolleys available to allow the Poolpod to be moved away from the poolside
- Takes just 20 Seconds to lower into the pool
- Lowers to a depth of 0.9m
- Installation requires just two anchors at the rear of the Pod
- Suitable for retrofit or new build pools
- Compatible with most pool types
