

- One folding piece* ■
- Compact and easily transported* ■
- For all lifting and moving situations* ■

molift® Smart 150

The Molift Smart 150 is designed to be easily wheeled and transported to where lifting and moving is required. It has been awarded The Norwegian Design Council's Award for Design Excellence. The Molift Smart 150 is easy to fold for wheeling and to unfold in preparation for use. The Molift Smart 150 can also be divided into two parts, without the use of tools, to reduce the weight for transporting. The heaviest part weighs only 13.5kg (30lbs). The Molift Smart's lifting range makes lifting from the floor simple. The standard 4-point suspension combined with a Molift sling ensures comfortable and correct positioning from lying to sitting and vice versa. The Molift Smart 150 is equipped with an automatic service notification. This built-in software calculates when the lifter requires servicing. It also has electric / manual lowering functions and emergency stop.

FEATURES

- Lightweight and easy to manoeuvre
- Portable and mobile
- 4-point suspension
- Environmentally friendly batteries
- No tools required

Molift Smart 150

Lifting capacity:	150 kg/23.6 stone
Lifting range:	1,42 m
