THE STAIRLIFT COMPANY

Stairlifts

Regain Your Home and Independence, with MediTek's elegant and stylish new stairlift.

MediTek is pleased to introduce its exciting new compact Stairlift which has been designed to meet the needs of discerning users world-wide. With its increased power and class-leading control technology you can be assured of the smoothest and safest ride available today.

The introduction of this new and extensive stairlift range further increases MediTek's renowned and unrivalled quality and reliability at a surprisingly competitive price.

MEDITEK SP100

If bending at the hips or knees presents a problem, then the SP100 Stand and Perch stairlifts offers a perfect solution, (100 kgs weight limit)

EXTERNAL STAIRLIFTS

MediTek stairlifts can be adapted for outside use

Please Note - All MediTek's Stairlifts come with a fitted safety belt which should be worn at all times

MediTek Stairlifts use 12 carriage supporting rollers, for the ultimate in comfort and safety.

Offset Seat

New Design Comfortable Low Footrest

BATTERY OPERATION

MediTek stairlifts use safe, low voltage and maintenance-free battery power (24 V DC) which ensures continued operation (on average up to 30 return journeys) in the event of a temporary power outage.

CONTINUOUS BATTERY CHARGING WITH NO TRAILING CABLES

MediTek's unique continuous charging system eliminates troublesome trailing cables or rail end charging station and ensures the stairlift is charged regardless of where it is parked. This is essential for long battery life and low operation costs.

STAIRLIFT CONTROL

To control your stairlift either use the simple, user-friendly joystick on the arm of the stairlift, or...

... remotely, by means of an infra-red hand-held controller that requires no unsightly wall-mounted control boxes or cables.

STANDARD OFFSET MANUAL SEAT SWIVEL

At the flick of a lever, the easy-to-use swivel chair can be manoeuvred into 45 or 85 degrees position and back again. The essential Seat Offset feature ensures a safe and easy access to and from the stairlift away from the top of the stairs.

OPTIONAL POWERED SEAT SWIVEL

The optional powered swivel chair is the ultimate choice for comfort and freedom of movement. At the touch of a switch is able to move into the parked or swivelled position with total ease.

MANUAL FOLDING HINGED TRACK

Where the stairlift track may obstruct a door or passageway, it is possible to use a Manual Folding Hinged Track. Alternatively for those who want ease of use without the need for extra controls there is...

POWERED FOLDING HINGED TRACK

This simple solution allows the track to fold up automatically as you ascend the stairs, and then automatically fold down as you descend the stairs. For safety and easy cleaning, both versions have all the moving components mounted neatly and unobtrusively inside the rail.

MEDITEK'S SLIMMEST EVER STAIRLIFT

For compactness individual fold-up armrests, seats and footrest are offered as standard.

LINKED FOOTREST OPTION

This simple solution allows the footrest and seat to be folded together without bending down.

AUTOMATIC OR MANUAL BRIDGING PLATFORM

Where there are just a few steps in a short bend (or 'fan') at the head of the stairway there is the option of fitting a Manual Bridging Platform. Alternatively and for the ultimate in ease of use there is a Battery Powered Bridging Platform. This worry free and unique design allows the platform to automatically move into the operation (down) position as you ascend the stairs and then automatically fold away as you descend the stairs.

Pressure Sensitive Footrest

Carriage Safety Switches

TOUCH SENSITIVE SAFETY COVERS

As standard the MediTek 140 comes complete with touch sensitive safety covers which are designed to prevent trapping hazards. Should the stairlift make contact with any obstruction on the stairwell, in either direction, movement of the covers will result in the immediate suspension of travel in that direction. The stairlift will still travel in the opposite direction to allow the obstruction to be removed.

DIAGNOSTIC DISPLAY PANEL

To allow a diagnosis without an engineer, MediTek has developed a time and money saving Self-Diagnostic System which can both identify and clearly display any fault which may occur, or report on its operation conditions.
