Simplicity 950 Series

The Simplicity offers you the very essence of a stairlift without compromising on quality or style. Designed by a team of experts who have distilled all that a stairlift should be into a compact and unobtrusive unit; this simple yet stylish design delivers a safe and reliable way to overcome the problems posed by stairs.

With four height settings and a maximum weight capacity of 19 Stone (120kgs) the Simplicity can accommodate a wide range of users and locations.

Designed primarily for straight staircases it can also be supplied with a platform to accommodate up to three stairs from a 90° intermediate top landing.

Minivator is an ISO 9000 registered company which means you can be sure your lift has been produced to the most stringent safety and quality requirements.

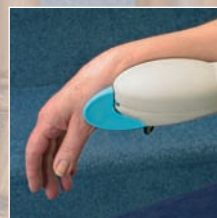

"Everything should be made as simple as possible, but not one bit simpler"

*Albert Einstein (1879-1955)
(Attributed)*

Minivator's unique toggle switch makes using the Simplicity straightforward.

The toggle can be positioned on the left or right to suit the user and can be operated by the hand or arm making it ideal for users with limited hand mobility. Simply move the toggle in your desired direction of travel.

The Simplicity can also be operated from either of the two wall mounted remote controls supplied as standard.

With two large high visibility buttons, these remotes are wire free and can be used to park the lift after use or by an attendant to operate the lift.

Slim Yet Spacious

The Simplicity is designed for maximum comfort with a wide cushioned seat and back rest. All seats are upholstered with flame retardant wipe clean fabric.

Space is at a premium in most hallways and the Simplicity is styled with this in mind, the result being an ultra slim folded unit that can be supplied with a hinged track if required.

Simple To Store

When not in use your Simplicity can be folded up and, using your remote control, you can send it wherever you choose on its track leaving the staircase clear for other users.

Thanks to its continuous charging strip the lift can be parked at any point and the batteries will receive a top up charge.

Safety As Standard

Every Simplicity comes with a clip seat belt as standard.

Not only is your footplate covered with an anti-slip hard wearing carpet, it also has safety edges that will cause the lift to stop should it meet any obstruction during use.

Tucked safely away the key switch can be easily accessed by folding the arm up. Removal of this key will enable you to disable the lift should you wish to prevent unauthorised use.

Simple To Install

Fixed to the stair not the wall, the Simplicity can be installed with minimum disruption to yourself or your décor.

The aluminium track is securely supported by three specially designed feet which support the aluminium track and fit neatly along the edge of your staircase.

Intelligent System

The Simplicity's self diagnostic system allows for easy identification of issues making rectification quicker and more efficient.

Simple To Swivel

When you reach the top of the stairs dismounting is safe and secure.

Swivel levers are located on both sides of the seat: pushing either swivel lever down smoothly turns the seat through to 90° so you are facing the landing fully to allow you the best possible exit.

The footplate finishes flush with the landing making it easier for you to position your feet.

Sturdy ergonomically designed arms provide excellent support to aid standing if required at the top or bottom.
