Victor Mobile Hoist:

Manufactured by Handi-Move International, the Victor 2600 Hoist has a very large lifting range and is widely used for Rebound Therapy. The Victor Hoist can lift a person from the floor or a wheelchair onto the main bed of a regulation size 77A trampoline.

Hoist Features:

The Victor has a weight limit of 225kg (35 stone) and comes with an electrically adjustable base as standard. Twice as fast as an average hoist, the Victor can be used with body support systems, seat slings and conventional looped slings to suit the vast majority of potential clients.

About Dolphin Mobility:

Dolphin supply, install and service a vast range of lifting products for the disabled. Specialists in the supply of stairlifts, hoists, access lifts and pool hoists Dolphin can offer practical, impartial advice as to the best product for your establishment, your staff and its users.
